Little display raft

KALONI'S WOOD PROJECTS | Ages 6+ with a grown-up

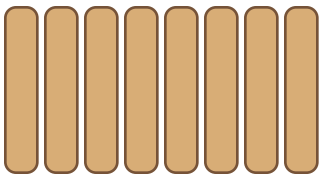

You'll need: 10 regular wooden craft sticks, water-based wood glue, scrap paper, pencil.

Work with a grown-up. Choose smooth sticks without splinters. No cutting or power tools needed. Protect your table and follow the glue label.

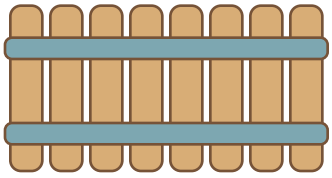

1. Count 8 sticks for the deck and 2 for the supports. Use smooth, pre-cut craft sticks.

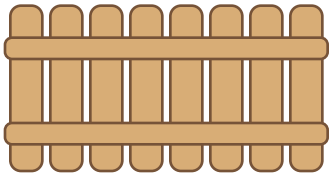

2. Lay the 8 deck sticks side by side. Line up their ends on scrap paper.

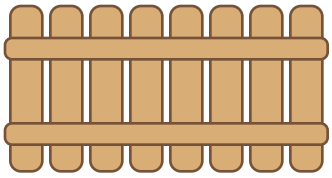

3. Place a thin line of glue across the deck near each end, keeping glue away from the edge.

4. Lay the 2 support sticks across those glue lines. They should touch all 8 deck sticks.

5. Leave it flat until the glue is fully cured, following the glue label. Do not lift it early.

6. Turn it over. Draw deck details with a pencil. This is a dry display model; keep it out of water.
