AVA'S HOUSE OF MAKING

Fold a paper fan

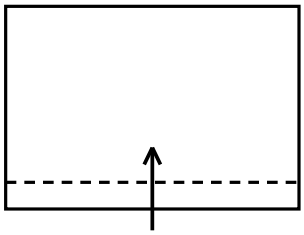

You need: one sheet of paper and crayons. Ages 5+ with help. No scissors or glue needed.

1

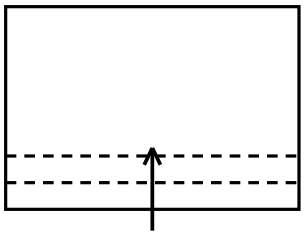

Decorate both sides of your paper. Leave it flat. A rectangular sheet works well.

2

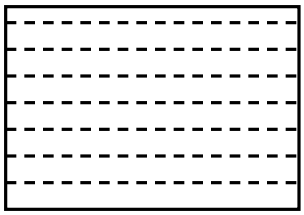

Fold a narrow strip upward along the bottom edge. Make it about one finger wide.

3

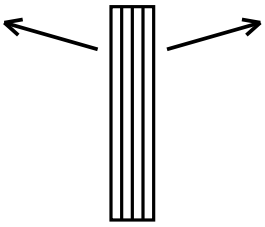

Turn the paper over. Fold the same width again, keeping the edges lined up.

4

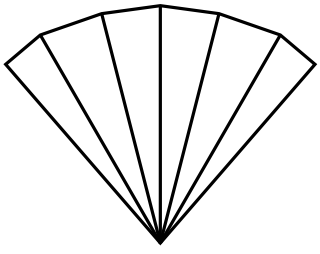

Keep turning over and folding the same width until you reach the other end.

5

Pinch one short end of the folded stack. Gently spread the other end into a fan.

6

Hold the pinched end and wave gently. Compare a narrow fold with a wide fold!
